

WOMEN4IT

Innovative solutions to increase the numbers of young women in the EU
into the digital agenda

29.09.2022

LIKTA

The project Nr.2017-1-094 "YOUNG-ICT WOMEN: Innovative Solutions to increase the numbers of EU vulnerable girls and young women into the digital agenda" benefits from a 2.714.304 € grant from Iceland, Liechtenstein and Norway through the EEA and Norway Grants Fund for Youth Employment. The aim of the project is to increase the numbers of EU vulnerable girls and young women into the digital agenda.

Our mission

To develop the digital competences of young women who are at risk of exclusion from the labor market, thus improving their employability and decreasing the ICT specialist gap in Europe

We address the following European wide challenges:

- Youth unemployment
- ICT specialist gap in Europe
- Low involvement of women and girls into digital jobs and ICT professions

Mission & Target Audience

To create attractive employment opportunities for young people in the Digital Economy

To create new innovative tech jobs for women as a source for economic growth and new role models for youth employment

To create new partnerships with employers for testing new innovative solutions

To provide a new online employability profiling tool and free training for customised digital jobs

- Unemployed young women age 18-29
- Women without targeted education
- Women in after maternity leave
- Women coming from low-income disadvantaged families

Main Activities

Training
8 digital job profiles

Mentoring

**Job Shadowing
Sessions**
(for each profile)

**Empowerment
Seminars**
9 topics

Project Outcomes
