Lightning Talks #ADSummit2022

Mission

Innovation and cooperation to transform education in Catalonia: we work to promote and extend new educational opportunities to overcome social inequalities.

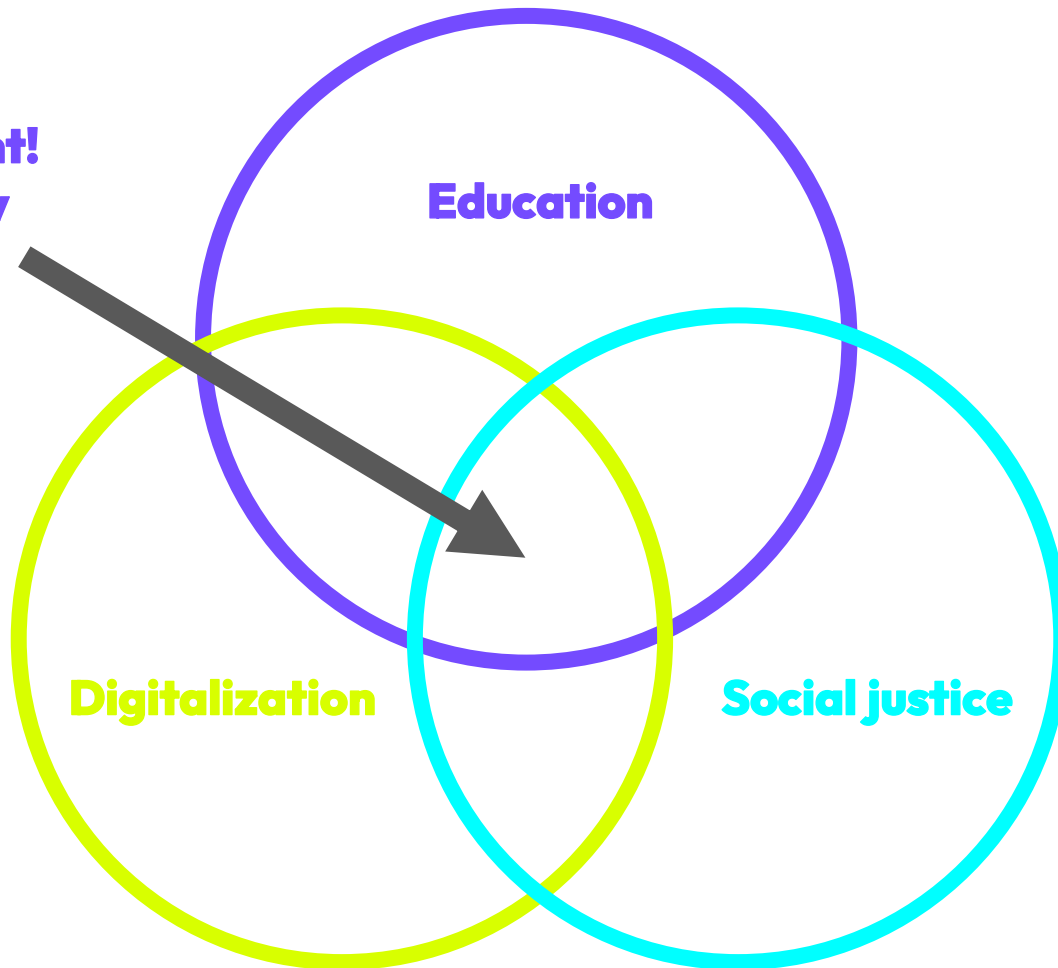

Main values of the organization

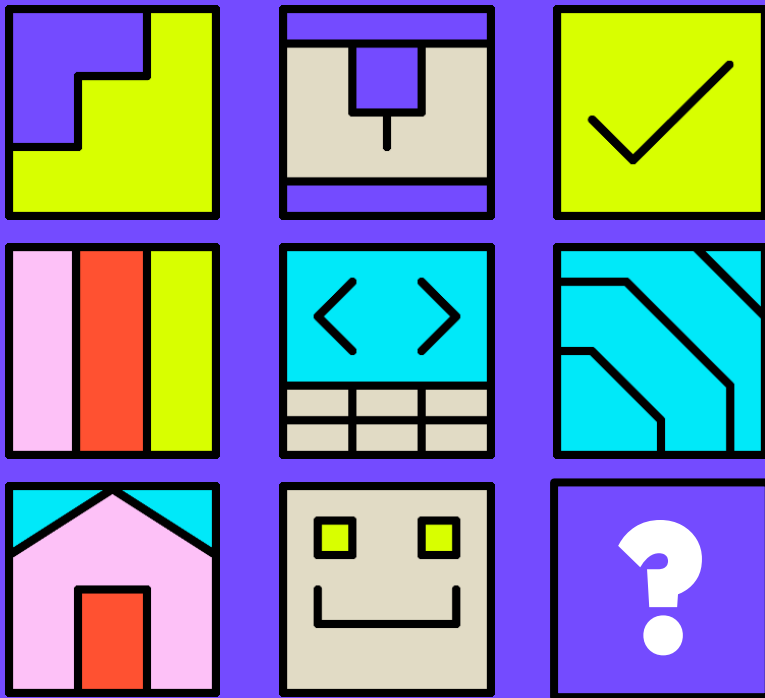

- Innovation
- Cooperation
- Rigor
- Independence

Our place, our lab

Within this framework, we are building a Digital Equity lab. This **will allow us to map the greatest challenges facing education in the digital acceleration that we are experiencing**. From AI, through disinformation or hybrid formats. A constant work of exploration, reflection, and launching of proposals that need to be appropriable by the educational community.

That's the point!
Digital Equity

Our focus of interests

1. Artificial intelligence
2. Digital literacy
3. Digital wellness
4. Maker education
5. Misinformation
6. Coding opportunities
7. Ethics data
8. Hybrid school
9. *What's next?*

AVALUACIÓ 4.0

Goal

Avaluació 4.0 is a project that will test an artificial intelligence (AI) solution applied to educational assessment processes, seeking to reduce the time spent by teachers in assessment processes.

Today

Between October and November we will develop workshops in Catalunya, among 1,000 students, in order to apply the AI algorithm solution which is evaluated.

What do we expect?

Research which benefits or risks could be related to the use of this technology into educational environments in order to growth, or reduce, the Digital Equity.
